The Fare Calculations Client Script dynamically calculates the applicable fare based on the selected source, destination, and number of passengers.

Figure 5

The screenshot shows the ServiceNow Catalog Items page. The left sidebar contains navigation links for Catalogs, Open Records, Requests, Items, Tasks, Catalog Definitions, My Catalogs, My Categories, My Items, Maintain Catalogs, Maintain Categories, Renderers, Maintain Dynamic Categories, Maintain Items, My Content Items, Content Items, Ordered Item Links, and My Order Guides. The main area displays a table of catalog items with columns for Name, Short description, Active, Roles, Catalogs, Category, Price, Type, and Updated. The first item, 'Book a metro ticket', is highlighted. Below the table, there is a pagination bar showing '1 to 20 of 158' items.

The Metro Project flow in Workflow Studio is configured with a Service Catalog trigger to automate the metro ticket booking process after a user submits the catalog item.

Figure 6

The Catalog UI Policy is configured to control the behavior of catalog variables dynamically based on the user's selections while filling out the metro ticket booking form.

Figure 7

The submitted metro ticket request is displayed in the Service Portal, allowing users to view the request number, requested item, status, and other request details.

Figure 8

The Metro Project flow execution is successfully completed, confirming that the catalog variables were retrieved correctly during the test run.

Figure 9

The Create Record action in the Metro Project flow maps catalog variable values to the Metro Station's Details table to automatically create a database record.

Figure 10

Access Control Lists (ACLs) are configured for the Metro Station's Details table to control create, read, write, and delete access to the stored records.

Figure 11

The screenshot displays the ServiceNow 'Access Controls' page. The left sidebar shows the navigation menu with 'Access Controls' selected. The main content area shows a list of access rules for the 'u_metro_database' scope. The table has columns for Name, Decision Type, Operation, Type, Active, Updated by, and Updated. The rules are for various database tables like 'u_metro_station_s_details', 'u_parent_tables', 'u_student', and 'u_user3', with operations including create, delete, read, and write. All rules are currently active and were updated by 'admin'.

Name	Decision Type	Operation	Type	Active	Updated by	Updated
u_metro_station_s_details	Allow if	create	record	true	admin	2026-07-25 08:20:53
u_metro_station_s_details	Allow if	delete	record	true	admin	2026-07-25 08:20:53

u_parent_tables	Allow if	create	record	true	admin	2026-06-23 21:27:13
u_student	Allow if	delete	record	true	admin	2026-06-02 00:46:03
u_student	Allow if	write	record	true	admin	2026-06-02 00:46:03
u_student	Allow if	create	record	true	admin	2026-06-02 00:46:03
u_student	Allow if	read	record	true	admin	2026-06-02 00:46:03
u_student.u_name	Allow if	read	record	true	admin	2026-06-03 03:33:27
u_user3	Allow if	write	record	true	admin	2026-06-02 20:59:35
u_user3	Allow if	read	record	true	admin	2026-06-02 20:59:35
u_user3	Allow if	delete	record	true	admin	2026-06-02 20:59:35

The Requested Items list displays the submitted service requests and their approval and stage information, demonstrating the tracking of metro ticket requests.

Figure 12

The screenshot displays the ServiceNow Workflow Studio interface for a workflow named "Metro Project". The workflow is in a "Completed" state, having finished on 2025-07-27 at 10:03. The workflow's configuration details are visible, showing a "Submitted Request" trigger with the ID "RITM00000004". The configuration includes several variables: "what_do_u_want_to_enter", "enter_smart_card_number", "enter_smart_card_name", and "recharge_amount", all of which are of type "String". The output data section shows the runtime values for these variables. The workflow is triggered by a "Submitted Request" with the ID "RITM00000004".

VARIABLE NAME	RUNTIME VALUE	CONFIGURATION	TYPE
what_do_u_want_to_enter		what_do_u_want_to_enter	String
enter_smart_card_number		enter_smart_card_number	String
enter_smart_card_name		enter_smart_card_name	String
recharge_amount		recharge_amount	String

VARIABLE NAME	RUNTIME VALUE	CONFIGURATION	TYPE
What do u want to enter		what_do_u_want_to_enter	String
enter smart card name		enter_smart_card_name	String
enter smart card number		enter_smart_card_number	String
recharge amount		recharge_amount	String

The ServiceNow request record confirms that a metro ticket request was successfully created and is available for tracking through the Service Portal.

Figure 13

The screenshot displays the ServiceNow 'Requested Items View: Self Service' interface. The left sidebar contains navigation links for various ServiceNow modules. The main content area shows a list of requested items with columns for Number, Catalog, Item, Approval, Quantity, and Stage. The bottom status bar shows the date and time as 21:02 on 28-07-2026.

Number	Catalog	Item	Approval	Quantity	Stage
RTTM0000003	(empty)	Double journey	Requested	1	Requested
RTTM0000005	(empty)	Double journey	Requested	1	Requested
RTTM0000004	(empty)	Double journey	Requested	1	Requested
RTTM0000002	(empty)	one person	Requested	1	Requested
RTTM0000001	(empty)	Railwayticket	Approved	1	Approved

The Metro Project flow is activated and published, enabling the automated processing of metro ticket booking requests submitted through the Service Catalog.

Screenshot of the ServiceNow Catalog Item configuration page for "Book A metro ticket".

The interface shows the "Catalog Item - Book A metro ticket" configuration page. The left sidebar contains navigation options under "Service Catalog", including "Catalog Definitions", "Maintain Catalogs", "Maintain Categories", "Maintain Dynamic Categories", "Maintain Items", "Maintain Cart Layouts", "Catalog Administration", "Request Parent Mapping", "Service Catalog Wizards", "Maintain Wizards", "Contract", "Contracts", "Maintenance", and "Configuration by Category".

The main content area displays the "Catalog Item" configuration for "Book A metro ticket". It includes a search bar, a "Related Links" section with links like "Item Diagnostic", "Show VA render type", and "Run Point Scan". Below this, there are tabs for "Variables (14)", "Variable Sets", "Catalog UI Policies (3)", "Catalog Client Scripts (4)", "Available For", "Not Available For", "Categories (1)", "Catalogs (1)", and "Catalog Data Lookup Definitions".

The "Related Articles" tab is selected, showing a table of related catalog items. The table has columns: "Short description", "Variable set", "Conditions", "Reverse if false", "On load", "Inherit", "Updated", and "Order".

Short description	Variable set	Conditions	Reverse if false	On load	Inherit	Updated	Order
Field Visibility	(empty)		true	true	false	2026-07-31 02:09:20	100
Book QR Ticket	(empty)		false	true	false	2026-08-01 01:32:02	100
Amount Fields Visibility	(empty)		true	true	false	2026-07-31 02:12:16	100

The bottom of the page shows a status bar with "No templates are available. Create A New One?" and a "New" button.

The Metro Station Details table is configured to store the information required for processing metro ticket booking requests.
