The Metro Station's Details table contains custom fields such as Station Name, Customer Name, Age, and No. of Items to capture the required booking information.

Figure 3

The screenshot displays the ServiceNow interface for configuring a table named 'Metro Station's Details'. The main area shows a list of columns with their respective types, references, max lengths, default values, and display settings. The 'Station Name' column is highlighted with a green border, indicating it is the selected column for editing. The page also includes a sidebar with navigation options like 'Clone Admin Console', 'Clone Definition', 'Protected Tables', 'Log Protection', 'Protected Table Log', 'System Archiving', 'Archive Tables', 'Archive Knowledge Use', 'Archive Audit Result', 'System Definition', 'Tables', 'Tables & Columns', 'Table Rotations', 'Decision Tables', 'Remote Tables', 'Tables', 'Definitions', and 'System Diagnostics'. The bottom of the page shows a Windows taskbar with various application icons and a system tray with weather and time information.

Column label	Type	Reference	Max length	Default value	Display
Updated by	String	(empty)	40		false
Sys ID	Sys ID (GUID)	(empty)	32		false
Updates	Integer	(empty)	40		false
Updated	Date/Time	(empty)	40		false
Created by	String	(empty)	40		false
Created	Date/Time	(empty)	40		false
Station Name	String		40	40	true

The Book a Metro Ticket catalog item is created in Service Catalog to allow users to submit their metro ticket booking requests through the ServiceNow platform.

Figure 4

Figure 4 displays a screenshot of the ServiceNow interface, specifically the 'Table - Metro Station's Details' configuration page. The interface shows a list of columns for the table, including 'Station Name', 'Customer Name', 'Age', and 'No. of Items', each with its data type, reference, max length, default value, and display status.

Column label	Type	Reference	Max length	Default value	Display
Updated by	String	(empty)		40	false
Sys ID	Sys ID (GUID)	(empty)		32	false
Updates	Integer	(empty)		40	false
Updated	Date/Time	(empty)		40	false
Created by	String	(empty)		40	false
Created	Date/Time	(empty)		40	false
Station Name	String		40	40	true
Customer Name	String			40	true
Age	Integer			50	true
No. of Items	Integer				false

The interface also includes a 'Dictionary Entries' section, a 'Related Links' section with links to 'Form Builder' and 'Design Form', and a 'No templates are available' message. The bottom of the screen shows the Windows taskbar with various application icons and system status indicators.

The Fare Calculations Client Script dynamically calculates the applicable fare based on the selected source, destination, and number of passengers.

Figure 5

The screenshot displays the ServiceNow Catalog Items page. The left sidebar contains navigation links for Catalogs, Open Records, Requests, Items, Tasks, and Catalog Definitions. The main area shows a table of catalog items with columns for Name, Short description, Active, Roles, Catalogs, Category, Price, Type, and Updated. The first item is 'Book a metro Ticket' with a price of £0.00. The second item is 'Brother Network-Ready Color Laser Printer' with a price of \$399.50. The third item is 'Camtasia' with a price of \$0.00. The fourth item is 'Canon imageCLASS LBP-6650DN Laser Printer' with a price of \$499.99. The fifth item is 'Carpet Cleaning' with a price of \$0.00. The sixth item is 'Catalog Client Script' with a price of £0.00. The seventh item is 'Catalog Item Builder' with a price of £0.00. The eighth item is 'Catalog UI Policy' with a price of £0.00. The ninth item is 'Catalog UI Policy Actions' with a price of £0.00.

Name	Short description	Active	Roles	Catalogs	Category	Price	Type	Updated

The Metro Project flow in Workflow Studio is configured with a Service Catalog trigger to automate the metro ticket booking process after a user submits the catalog item.

Figure 6

The screenshot shows the ServiceNow interface for configuring a Catalog Client Script. The left sidebar contains a navigation menu with options like 'Catalogs', 'Open Records', 'Requests', 'Items', 'Tasks', 'Catalog Definitions', 'My Catalogs', 'My Categories', 'My Items', 'Maintain Catalogs', 'Maintain Categories', 'Renderers', 'Maintain Dynamic Categories', 'Maintain Items', 'My Content Items', 'Content Items', 'Ordered Item Links', and 'My Order Guides'. The main area is titled 'Catalog Client Scripts - FareCalculations' and includes a search bar and 'Update' and 'Delete' buttons. The configuration fields are as follows:

- Name: FareCalculations
- Applies to: A Catalog Item
- Active: ☒
- UI Type: All
- Application: Global
- Type: onChange
- Catalog item: Book a metro Ticket
- Variable name: -- None --
- Applies on a Catalog Item view: ☒
- Applies on Requested Items: ☒
- Applies on Catalog Tasks: ☒

The script editor shows the following code:

```
1 function onChange(control, oldValue, newValue, isLoading) {  
2  
3   if (isLoading || newValue === '') {  
4     return;  
5   }  
6  
7  
8  
9   var source = g_form.getValue('starting_from');  
10  
11   var destination = g_form.getValue('going_to');  
12  
13   var numPassengers = parseInt(g_form.getValue('no_of_passangers'));  
14 }
```

The bottom status bar indicates 'No templates are available Create A New One?' and shows the system time as 21:30 on 25-07-2026.

The Catalog UI Policy is configured to control the behavior of catalog variables dynamically based on the user's selections while filling out the metro ticket booking form.

Figure 7

The submitted metro ticket request is displayed in the Service Portal, allowing users to view the request number, requested item, status, and other request details.

Figure 8

The screenshot shows the ServiceNow interface for configuring a Catalog UI Policy. The left sidebar contains navigation links for Self-Service, Business Applications, Dashboards, Service Catalog, Employee Center, Knowledge, Visual Task Boards, Incidents, Watched Incidents, My Requests, Requested Items, Watched Requested Items, My Connected Apps, My Profile, My Tagged Documents, My Tags, My Knowledge Articles, and Take Survey. The main content area is titled 'Catalog UI Policy - Metrocatlogitem'. It features a search bar, 'Update', and 'Delete' buttons. Below this is a configuration section with a dropdown menu set to 'recharge_amount', a condition 'is', and a target 'Others'. There are three checkboxes for applying the policy: 'Applies on a Catalog Item view' (checked), 'Applies on Catalog Tasks' (unchecked), and 'Applies on Requested Items' (unchecked). Two blue boxes provide instructions: 'Apply the catalog UI policy actions when the form is loaded or when the user changes values on the form' and 'Reverse the effects of the catalog UI policy actions when the Conditions evaluate to false'. There are also checkboxes for 'On load' (checked) and 'Reverse if false' (checked). Below this are 'Update' and 'Delete' buttons. A 'Related Links' section includes a link to 'Run Point Scan'. A table titled 'Catalog UI Policy Actions' shows one action for 'recharge_amount' with 'Read only' set to 'Leave alone', 'Mandatory' set to 'True', and 'Visible' set to 'True'. The table has columns for Name, Read only, Mandatory, Visible, and Order. The bottom status bar shows 'No templates are available Create A New One?' and a system tray with weather, search, and system icons.

ServiceNow Catalog UI Policy configuration for 'Metrocatlogitem'. The policy is configured for the 'recharge_amount' variable, applying actions when the form is loaded or when the user changes values. The policy is set to 'On load' and 'Reverse if false'.

Name	Read only	Mandatory	Visible	Order
recharge_amount	Leave alone	True	True	100

The Metro Project flow execution is successfully completed, confirming that the catalog variables were retrieved correctly during the test run.

Figure 9

The Create Record action in the Metro Project flow maps catalog variable values to the Metro Station's Details table to automatically create a database record.

Figure 10

The screenshot displays the ServiceNow Workflow Studio interface for a workflow named 'Metro Project'. The main canvas shows a step titled 'Create Metro Station's Details Record'. The 'Action Properties' section indicates the action is 'Create Record'. The 'Action Inputs' section is configured with the following inputs:

- Table:** Metro Station's Details (u_metro...)
- Fields:**
 - Customer Name: 1 - Get ... what_do_u_want_to...
 - Updated by: 1 - Get ... enter_smart_card...
 - Created: 1 - Get ... enter_smart_card...
 - No. of Items: 1 - Get Catalog ... recharge_am...

The right-hand 'Data' panel shows the flow of data variables:

- Trigger - Service Catalog:**
 - Requested Item Record: Record
 - Run Start Time UTC: Date/Time
 - Table Name: Table Name
 - Run Start Date/Time: Date/Time
- 1 - Get Catalog Variables:**
 - what_do_u_want_to_enter: String
 - enter_smart_card_number: String
 - enter_smart_card_name: String
 - recharge_amount: String
- 2 - Create Record:**
 - Metro Station's Details Rec...: Record
 - Metro Station's Details Ta...: Table

The bottom status bar shows 'Status: Modified' and 'Application: Global'. The system tray at the very bottom indicates a temperature of 35°C, mostly cloudy weather, and the date 27-07-2026.

Access Control Lists (ACLs) are configured for the Metro Station's Details table to control create, read, write, and delete access to the stored records.

Figure 11

The screenshot displays the ServiceNow 'Access Controls' page. The left sidebar shows the navigation menu with 'System Security' expanded, highlighting 'Access Control (ACL)'. The main area shows a list of access control records. The table has columns for Name, Decision Type, Operation, Type, Active, Updated by, and Updated. The records are filtered by 'Name >= u_metro_database'.

Name	Decision Type	Operation	Type	Active	Updated by	Updated
u_metro_station_s_details	Allow If	create	record	true	admin	2026-07-25 08:20:53
u_metro_station_s_details	Allow If	delete	record	true	admin	2026-07-25 08:20:53

recharge amount			String

Logs

The ServiceNow request record confirms that a metro ticket request was successfully created and is available for tracking through the Service Portal.

Figure 13

The screenshot displays the ServiceNow 'Requested Items View: Self Service' interface. The left sidebar shows a navigation menu with 'Self-Service' selected, leading to 'My Requests' and 'Requested Items'. The main area shows a list of requested items with the following data:

Number	Catalog	Item	Approval	Quantity	Stage
RITM0000003	(empty)	Double journey	Requested	1	○ ○ ○ ○ ○ ○ ○ ○
RITM0000005	(empty)	Double journey	Requested	1	○ ○ ○ ○ ○ ○ ○ ○
RITM0000004	(empty)	Double journey	Requested	1	○ ○ ○ ○ ○ ○ ○ ○
RITM0000002	(empty)	one person	Requested	1	○ ○ ○ ○ ○ ○ ○ ○
RITM0000001	(empty)	Railwayticket	Approved	1	○ ○ ○ ○ ○ ○ ○ ○

The bottom status bar indicates the date and time as 21:02 on 28-07-2026.

The Metro Project flow is activated and published, enabling the automated processing of metro ticket booking requests submitted through the Service Catalog.
